Installing Auto on Windows

- install Python 2.7, NumPy, Matplotlib
  - make sure either 32 or 64 bit versions are installed and need to be compatible
- install MinGW including msys, msys-base, gcc, and fortran
  - msys shell in C:\MinGW\msys\1.0\msys.bat
    home directory in C:\MinGW\msys\1.0\home\n- add path C:\MinGW\bin to user environment variables under My Computer : Advanced tab (use PATH variable)
- configure and compile Auto
- need text editor: vim from vim.org is one option
