

Luca Dal Negro received both the Laurea in physics, *summa cum laude*, in 1999 and the Ph.D. degree in semiconductor physics from the University of Trento (Italy) in 2003. After his Ph.D. he joined MIT as a post-doctoral research associate. Since January 2006 he has been a faculty member in the Department of Electrical and Computer Engineering and in the Material Science Division at Boston University (BU). He is currently tenured Associate Professor and a faculty member of the Photonics

Center and the Department of Physics at BU. Prof. Dal Negro manages and conducts research projects on light scattering from complex media, nano-optics, plasmonics, and metamaterials. He is funding principal editor of the journal *MRS Communications*, published jointly by the Materials Research Society and Cambridge University Press, as well as editor of the *European Physical Journal (EPJ) Plus*, published by Springer-Verlag for the European Physical Society. He has authored and 220 technical papers, 10 book chapters, holds 10 patents, and has currently an h-index of 47 with more than 10,000 citations. His research resulted in several Awards including the Early Career Research Excellence Award and the National Science Foundation (NSF) Career Award. Prof. Dal Negro has recently been elected Fellow of the Optical Society of America “*For his numerous contributions in the theoretical and experimental aspects of wave interaction with aperiodic nanostructures*”.
